

NOTE: Due to COVID some places may require face coverings and may limit the number of people permitted at one time or may limit the time that one person may be there so that others can enter.

Warming Center – A **short term** emergency location where people can get out of dangerous temperatures to prevent injury or loss of life. Typically, a stopping point until the people can move on, or to, a more appropriate facility. No food or sleeping accommodations are provided. Some warming centers are 24 hour businesses where people can stop in.

Shelter – Severe weather shelters are emergency locations where people can get out of dangerous temperatures to prevent injury or loss of life. Shelters provide food and (typically) places to sleep. These are longer term than warming centers. Stranded travelers, the homeless population, and families that have lost heat or electricity are the population that shelters are established to assist.

GIS Map of warming centers/shelters: <https://arcg.is/1S8eWC0>
